Ticket Volume Trend

Key Insights

- 91% of all tickets are Closed (45.982 out of 50.000) , indicating a high overall completion rate .
- Only 191 tickets are currently open , including in Progress , Pending and Reopen tickets .
- Access & Authentication has the highest ticket volume , with approximative 7.1k tickets , followed by Email & Collaboration and Network .
- Average Customer Satisfaction is 4 out of 5 ,suggesting generally positive service quality .

Business Recommendation

- Investigate recurring issues in Access & Authentication to identify opportunities for automation , self-service or preventive actions .
- Continue monitoring the 191 active tickets , especially Pending and Reopened cases , to prevent backlog growth .
- Review the causes of the 2.267 cancelled tickets determine whether process improvements could reduce unnecessary ticket creation .

Key Insights

Reopen Tickets sunt ticketele care au avut cel putin o redeschidere de- a lungul ciclului lor de viata.

Business Recommendation

De ce se redeschid aceste tickete ? poate problema nu a fost rezolvata definitiv , poate exista probleme care reapar sau poate utilizatorii au nevoie de instructiuni mai bune .

Key Insight

Network Support are cel mai mare volum de tichete, aproximativ 10.2k
Security Operations are cel mai mare Average Resolution Time , aproximativ 147 ore.
Identity & Access are unul dintre cei mai mici timpi de rezovare , aproximativ 73 ore .
Portal este principalul canal de creare a tichetelor , cu aproximativ 19000 din totalul de 50000 de tichete

Business Recommendations

Password Reset si **Account Locked** din categoria Access and Authentification sunt subcategorii foarte bune pt **self -service** si **automatizare .**
De exemplu , utilizatorul isi poate reseta singur parola prin portal (care este o pagina /aplicatie prin care utilizatorii isi pot crea singuri un ticket atunci cand au o problema sau o solicitare) , iar sistemul poate trimite notificari inainte de expirarea parolei pt a preveni blocarea contului .
